PROFILE

Numbers and problem solving have been a part of my life for as long as I can remember. Whether it was in my undergraduate studies of mathematics or throughout my prior experience in accounting and finance, I find myself doing calculations in most things I do. I have an affinity for numbers, a passion for learning, and a strong desire to help others. I am excited to use data analytics and help organizations make decisions with their data.

SKILLS

- PYTHON
- SQL
- POWER BI
- TABLEAU
- ADVANCED EXCEL (PIVOT TABLES, VLOOKUPS)
- GOOGLE SHEETS/DOCS/SLIDES
- POWERPOINT
- JUYPTER NOTEBOOKS

PROFESSIONAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

DATA ANALYTICS | MARCH 2020 - JUNE 2020

- Learned how to apply statistical reasoning through hands-on training in tools such as Excel, Python, SQL, Tableau, and Power BI
- Used real data from local companies in a variety of problem domains, such as healthcare, government, and digital marketing
- Gained practical experience in all stages of the analytics workflow - including extracting, transforming, and loading data, as well as storytelling, building reports, and creating dashboards

PROJECTS

NYC MARATHON - CAPSTONE PROJECT

- Created an interactive Tableau dashboard on NYC marathon results for the last five years, comparing weather and GDP data
- Used Python for exploratory data analysis, data cleaning, and chart creation
- Web-scraped to obtain running results
- Tools Used: Python, Tableau, Excel, Google Slides

NASHVILLE BUILDING PERMITS - PROJECT

- Used Tableau to create multiple dashboards from the Nashville building permits data for permits that were entered and issued in a rolling 3 year time period
- Created maps and graphs showing areas in Nashville that are growing the most, the types of buildings that are being constructed in those areas, and costs associated with this growth
