ABOUT ME

I give high importance to data analytics and the use of insights in an essential business matter. I obtained knowledge of coding and maintaining data from college. My critical thinking outlined a path into data analysis, from a data entry job furthermore to become an outgoing toward data, in 2014, I travel to the U.S and found an opportunity to work in a restaurant business. My consistent work with collaborative increased productivity which, approved me to become an assistant manager. I created the opportunity to raise sales, attract customers, and measuring steps that can influence production and expand improvements. With more interest in data, I joined Nashville software school to assist me in discovering more throughout my journey. Now as a data analyst, I dedicate my experience for any organization to utilize the data points for the most valuable purpose.

SKILLS

- SQL
- Python
- Excel
- Data Storytelling
- Tableau
- Power BI
- Tri-Lingual: English, Arabic, Kurdish

EDUCATION

Nashville Software School
Data Analytics Bootcamp

Middle Tennessee State University
Sophomore, Computer Science

Foundation Of Technical Education
B.S. – Computer Software Engineering

DATA EXPERIENCE AND PROJECTS

Apprentice Data Analyst , Nashville Software School   2020 - present

Intensive introduction to data analysis processes and tools. Project-based learning provides real-world tools and improves intuitive knowledge in data cleaning, data types and conversions, exploratory data analysis, building reports and creating dashboards, and storytelling through data visualization, hands-on training on every stage of the analytics workflow, using SQL, Excel, Tableau, Power BI., Python

Nashville City Cemetery(NCC): Individual Project
Clean out NCC burial record for data stories within the historical information and create a sold material for marketing
- **Seven deliverable points**: Include interactive charts, marketing graphics, and plots of death rates, top 5 causes of death, age category patterns, and disease trivia
- **Tools and Skills**: Excel, Pivot tables/charts,Vlookup,graph, slicer, timeline, data storytelling, writing
